Full-Stack / Blockchain Engineer focused on Web3 and AI automation, committed to continuous learning — sharpening the practices behind the technologies I already master while picking up new skills in emerging tech.

PROFESSIONAL EXPERIENCE

MultiDeploy — Web3 Developer

Independent / Remote

2025

- Built a cross-chain smart contract deployment orchestrator (Next.js, TypeScript, Solidity) supporting Arc, Tempo, and Base mainnet.
- Processed 5,000+ transactions per deployment round while maintaining production stability.

Arch Oracle — Blockchain Engineer

Independent / Remote

2024

- Built the first decentralized floor-price oracle for Bitcoin Ordinals on Arch Network, using Rust.
- Designed enterprise-grade infrastructure for on-chain price data consumption.

Smart Contract Security Scanner — Security Tooling Developer

Independent / Remote

2025

- Built a multi-chain security analyzer (React) covering 7 EVM chains.
- Implemented rug-pull detection, scam pattern recognition, and liquidity-lock analysis.

Convallax AMM Bot — Web3 / DeFi Developer

Independent / Remote

2026

- Developed an automated options market-making bot (TypeScript) on Polygon Amoy testnet.
- Implemented live PnL tracking and automatic spread management.

ContentBot & Web3 Newsletter Generator — AI Automation Developer

Independent / Remote

2026

- Built AI-powered content automation pipelines (Python) that generate and publish Web3 newsletters across Telegram, X, and email.

Court Line & Pitch Read — AI/ML Developer

Independent / Remote

2026

- Built an Elo-based NBA score predictor (Next.js) with a daily self-grading learning loop.
- Built a cricket win-probability model (Python, scikit-learn) trained on 18,000+ international matches.

EDUCATION

B.Sc. Computer Science

Nigeria

Completed

ADDITIONAL SKILLS

- English (Fluent)
- Git/GitHub
- TypeScript, JavaScript, Python, Solidity, Rust
- React, Next.js, Node.js, Flask
- Independent, fast-shipping delivery — idea to live mainnet
